

Fiber Optic Cable Single Mode 48 Cores In/Out

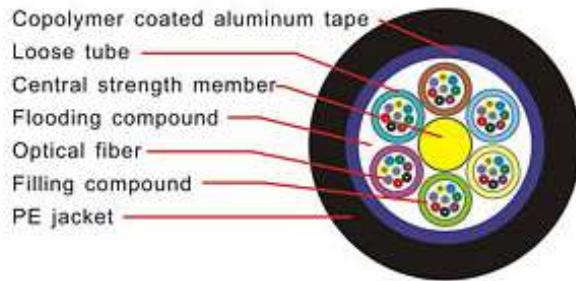

Broadstick provides fiber optic cable that exceeds the ANSI/TIA 568-C.2.

The Broadstick fiber cable provides a high quality connection for Data Centers telecom rooms, equipment distribution areas, desk, etc.

This cable allows easy movements, installations and changes.

This cable is used for duct or aerial applications, installations for long haul communication and LANs, especially suitable for the situation of high requirements of moisture resistance
